This really is what is aimed at, and operations will not be confined to Fall River but extended to Lowell, Lawrence, New Bedford and the best mills in the country. The Fall River mills have capital exceeding twenty million dollars and an investment probably of thirty million dollars or more. Just how negotiations will be instituted will interest outsiders as these mills are owned of a dead body at Shreveport was teleby thousands of stockholders. The directors have no power to sell the mills, and beyond a few hundred shares probably little stock could be bought at anything like prevailing prices.
